

MATIN NEMATI

Tehran, Iran

(+98) 930 082 1831 MatNemati@gmail.com

Website: MatNemati.ir LinkedIn: [MatNemati](#)

Professional Summary

B.Sc. graduate in Electrical Engineering with a Minor in Computer Science (July 2026) from IUT.

Interested in Statistical Analysis and Data Analysis in the fields of Finance, Business, and Neuroscience.

Also interested in Neurotech, emerging Technologies, and Cutting-Edge Scientific Innovations.

+4 years of experience in teaching and education.

Open to pursuing an MBA in the future, driven by an interest in finance, management and business.

Career Interests

Data Scientist | Data Analyst | Business Analyst | Financial Analyst | Research Assistant

Education

Isfahan University of Technology (IUT)

Sep. 2022 – Jul. 2026

B.Sc. in Electrical Engineering (Bioelectricity & Neuroscience)

Minor in Computer Science

Overall GPA: 3.35 / 4.00 | Final-Year : 18.02 / 20 | Major GPA: 18.43 / 20

Skills

Programming: [Python](#) (NumPy, Pandas, Matplotlib, OOP), MATLAB, R

Data Analysis: Statistical Analysis (Hypothesis Testing, ANOVA, Regression, T-Test, ...), Data Cleaning, EDA,...

Machine Learning: Supervised & Unsupervised Learning, Neural Networks, Regularization, ...

Databases: SQL (T-SQL)

Business Intelligence: Power BI

Signal Processing: Digital Signal Processing, EEG, ECG, EMG, Biomedical Signals

Neuroscience: Neural Modeling, Systems and Computational Neuroscience

Simulation: PSpice, Proteus

Tools: Git, Microsoft Office Suite, $\LaTeX$

Soft Skills

ISTJ personality, with interests in mountaineering, volleyball, and exploring deep and real-world problems.

Also passionate about **Teaching** and knowledge sharing.

- Problem-Solving
- Analytical Thinking
- Attention to Detail
- Independent Research & Self-Learning

Teaching & Professional Experience

Mathematics, Physics & Python Instructor

2020 – 2024

Taught and mentored more than 100 students while designing structured study plans and problem-solving strategies.

Educational Team Lead & Academic Advisor

2021 – 2025

Started as an academic advisor at [Heyva Group](#) in 2021, and later led multiple educational teams between 2023 and 2025, providing academic planning and student guidance.

Teaching Assistant (Python) & Programming Mentor

2022

Isfahan University of Technology

Teaching Assistant for undergraduate students, mentoring in programming, debugging, and problem-solving.

Certifications, Academic Background & Selected Coursework

For detailed information about my academic background, academic transcripts, certifications, and completed coursework, please visit [Academic Portfolio](#).

Research Interests

- Neuroscience (Clinical & Computational)
- Neuro & Biomedical Devices
- Emerging Technologies
- Statistical Inference
- Data Analysis
- Financial Markets
- Business Management & Organizational Leadership
- Financial Analysis

Research Experience & Projects

Quantum Phenomena in Biological Systems: Implications for Brain Function

B.Sc. Thesis-Fall2025

Isfahan University of Technology

Conducted a systematic and critical review of theoretical models and experimental evidence investigating the possible role of quantum phenomena in the brain and nervous system, with emphasis on their biophysical feasibility and functional implications.

EMG Signal Classification: Wrist vs. Arm

MATLAB

Biomedical Signal Processing Laboratory

Implemented a MATLAB-based pipeline for classifying EMG segments associated with wrist and arm movements using conventional signal processing and classification techniques.

[GitHub Repository](#)

Speaker Recognition Using Speech Signal Processing

MATLAB

Academic Project

Developing a speaker recognition pipeline based on speech signal processing, including windowing, feature extraction, and classification using a public speaker recognition dataset.

Autonomic Biomarkers, Self-Control, and Cognitive Behavior

R

Statistical Analysis Project

Investigating whether autonomic physiological biomarkers can explain individual differences in self-control and their association with cognitive behaviors using statistical inference methods on a large-scale public dataset.

The above list may not always reflect my latest research activities and projects.
